# Biophilic Garden *Sense of Gustatory*

Detail plan perspective

*Section*

The biophilic garden is located in the wellness area. focused on the sense of gustatory, therefor it is based on natural icelandic fauna, herbs and edible plants together with perennials and trees reflecting wild nature. Free spirit garden with water elements, mysterious trails and rest areas. The biophilic garden is intended not only for human taste, but also for butterflies and bees. Together, this creates a magical environment where a person meets oneself and nature.
